

Bruno Bronosky

job-application@bronosky.com · (404) 992-7866 · richardbronosky.github.io/resume/

Professional Summary

Engineer, architect, and mentor with 28+ years in DevOps, cloud platforms, infrastructure automation, and software engineering. I power these disciplines with an AI-augmented workflow, leveraging autonomous agents (OpenClaw, OpenCode) and self-hosted LLMs to massively accelerate infrastructure delivery, pipeline analysis, and code refactoring. Adept at building secure API tools for AI integration, teaching best practices, and driving business-critical transformations across cloud, mobile, and embedded systems.

Work Experience

Intelrad Medical Systems | **Technology Consultant** | (Nov 2025 - Present)

- Develop AI tools to shorten ticket completion times
- Develop AI tools to on-board new team members
- Document Dev-Ops processes and Infrastructure to improve AI tool efficiency.
- Dev-Ops

Triton | **Research Fellow** | (Jul 2023 - Present)

- Manage engineers and projects
- Developed secure API endpoints and OpenClaw agent skills to automate infrastructure interaction and monitoring
- Deployed local, privacy-compliant LLMs to accelerate engineering velocity while protecting proprietary data
- Leveraged AI coding agents to rapidly refactor complex systems and automate infrastructure-as-code
- Mentored engineering teams on adopting AI-augmented workflows and integrating LLMs into CI/CD pipelines
- Validate R & D plans and results
- 3D modeling and CNC manufacturing
- Safety and fire suppression
- Design and implement sensor arrays for data gathering
- Develop real-time monitoring systems in Python
- AI data analysis and fault prediction
- Plan and administer a Digital Arts division

(Confidential) International Airline | **(Contract) Trainer of DevOps Engineers** | (Sep 2022 - Jul 2023)

Value: \$10B+ Employees: 90k+

- CI/CD with Harness.io, AWS infrastructure with CDK+CFN, Migration to Github Enterprise from 5 other VCS
- architect and develop an internal ML/AI Software Development Co-Pilot trained on internal code repos to reduce code "re-invention" and time/effort

(Confidential) Cybersecurity and Biometric Identity Org | **(Contract) Trainer of DevOps Engineers** | (May 2022 - Sep 2022)

Value: \$3B+ Employees: 10k+

- CI/CD with CloudBees/Jenkins and Argo-CD
- software testing with SonarQube, JMeter, and various other tools

(Confidential) Financial Services Org | **(Contract) Trainer of Robotics, Computer Vision, and ML Engineers** | (Nov 2021 - Apr 2022)

Value: \$1T+ Employees: 225k+

- Robotics R&D, GCP, Machine Learning, Computer Vision, Software Development, Network & Physical Architecture, DevSecOps, Linux System Administration
- ROS 1&2 [Robotics Operating System], Dobot CR5, Python, C++

(Confidential) Chemical Engineering R&D and Production Org | **(Contract) Trainer of DevOps Engineers** | (Feb 2021 - Sep 2021)

Value: \$10B+ Employees: 90k+

- CI/CD with Jenkins, SonarQube, JMeter, various software testing tools
- Azure & AWS infrastructure and network security architecture
- Architected an internal ML/AI Software Development Co-Pilot trained on internal code repos to reduce code "re-invention" and time/effort

Rooms To Go | **Principal DevOps Engineer** | (Nov 2018 - Feb 2021)

- Direct and train a department of DevOps Engineers and SREs.
- Train developers to follow DevOps & CI/CD processes.
- Architect Hybrid-Cloud and Multi-Cloud infrastructure.
- Set and enforce security practices.
- Develop tools and services in bash, Node.js, Python, and Go.
- Design, build, and deploy Docker containers, API Gateways.
- Automate and orchestrate infrastructure with Packer and Terraform.
- Build and maintain [Fargate] ECS, EKS, and Kubernetes clusters serving microservices.
- Manage AWS costs.

- Make and document changes to AWS infrastructure via aws-cli.
- Manage network security with AWS Security Groups, iptables, and OpenVPN.
- Maintain MongoDB and DynamoDB databases.

MidAmerican Energy Services | **DevOps Team Leader** | (Oct 2016 - Jul 2018)

- Orchestrate infrastructure with Packer, Terraform, Chef, and Ansible.
- Build and maintain Kubernetes clusters serving microservices.
- Develop tools in Python, Go, bash, awk, sed, CircuitPython, and Arduino.
- Build and maintain Cassandra, MongoDB, and MySQL databases.
- Build custom Raspberry Pi images for IoT devices sent to client locations.
- Design, 3D Model, and CNC mill custom IoT hardware cases.

Cox Media Group [Technology] | **Solution Architect, Mobile** | (Dec 2012 - Oct 2016)

- Develop mobile client and backend POCs.
- Architect and deploy cloud infrastructure.
- Develop and maintain original Open Source software projects.
- Workflow and process automation.
- Lead mobile architecture and technical strategy.
- Present and teach.

Cox Media Group [Technology] | **Software Development Manager** | (Nov 2009 - Dec 2012)

- Co-Manage a ~30 developer team.
- Improve performance through coaching.
- Encourage and inspire developers and vendors to give great service.
- Workflow automation scripting.
- Architect and develop software.

Cox Media Group [Technology] | **Internet Systems Manager & MySQL DBA** | (Jul 2008 - Nov 2009)

- Administer GNU/Linux servers.
- Manage a department of sysadmins.
- Workflow automation and config management.

Cox Media Group (Atlanta Journal-Constitution) | **MySQL DBA** | (Jan 2007 - Jul 2008)

- Administer MySQL.
- Optimize developer code.
- Maintain high availability and performance.
- Develop extra Django and Rails projects.

Yahoo! | **Technical Yahoo!** | (Mar 2004 - Jan 2007)

- Manage teams, projects, SLAs.
- Automate workflows.
- Develop PHP web applications.
- Administer FreeBSD, Apache, MySQL.

Various | **Prior Professional Experience** | (Aug 1995 - Jan 2007)

- Companies include: Apple Computer, Lanier Worldwide, MedCenterDirect, Amazing Graphics, World Wide Development, and freelance work
- Tasks include: Technical Account Manager, Full Stack Developer, 3D Modeling, Graphic Design and Print Prepress

Skills

AI & Agentic Automation: OpenClaw & OpenCode · Agentic Workflows (MCP) · AI-to-API Integration · Local / Private LLMs · AI-Assisted CI/CD · Prompt Engineering

Amazon Web Services: CDK · CFN · EC2 · ECS · EKS · Fargate · EBS · ELB · RDS · S3 · SNS · SQS · IAM · VPC · SSM · Lambda · Route53 · CloudFront · CloudWatch · GuardDuty · DynamoDB · Auto Scaling

Automation/Orchestration & CI/CD: GitOps · Terraform · Packer · Ansible · Chef · CloudFormation · CDK · Jenkins · ArgoCD

Observability/Monitoring: Prometheus · Grafana · OpenTelemetry · OpenMetrics · OpenTracing · Nagios · Datadog · New Relic · Splunk · ELK; Elasticsearch, Logstash, Kibana

Machine Learning, Artificial Intelligence: Language Model · LLM · Neural Network · Transformer · GAN; Generative Adversarial Network · Computer Vision · NLP; Natural Language Processing · TensorFlow · PyTorch · Mojo · automatic1111 · oobabooga

Kubernetes, Docker, and containers: containerd · Podman · Helm · Argo-CD; Argo Project

GNU/Linux and BSD Server Administration: Linux · FreeBSD · OpenBSD · MacOS · Arch Linux, BTW · Debian · RHEL; Red Hat Enterprise Linux · CLI; Command Line Interface · SSH · Systemd; systemctl · System V; SysV Init · LSB; Linux Standard Base

Bash/Shell Scripting: POSIX sh · GNU Bash · Zsh

Graphics: Adobe Creative Suite · OpenSCAD · FreeCAD · Fusion 360

Web Development: HTML · CSS · JavaScript; ECMAScript · PHP

Interpreted Languages: Node.js · Python

Compiled Languages: Rust · Go/GoLang · C/C++
