Bruno Bronosky

job-application@bronosky.com · (404) 992-7866 · bronosky.com/resume/

Professional Summary

Engineer, architect, and mentor with 30+ years in DevOps, cloud platforms, infrastructure automation, and software engineering. I turn operational work into durable scripts, API integrations, and CI/CD workflows across Python, Bash, GitHub Actions, and AWS, Azure, and GCP. I power these disciplines with an AI-augmented workflow, leveraging autonomous agents (OpenClaw, OpenCode) and self-hosted LLMs to massively accelerate infrastructure delivery, pipeline analysis, and code refactoring. Adept at building secure API tools for AI integration, teaching best practices, and driving business-critical transformations across cloud, mobile, and embedded systems.

Work Experience

Intelerad Medical Systems | **Technology Consultant** | (Nov 2025 - Present)
- Develop AI tools to shorten ticket completion times
- Develop AI tools to on-board new team members
- Document DevOps processes and Infrastructure to improve AI tool efficiency.
- Automate and document repeatable infrastructure operations rather than relying on manual procedures.
- DevOps

Triton | **Research Fellow** | (Jul 2023 - Present)
- Manage engineers and projects
- Developed secure API endpoints and OpenClaw agent skills to automate infrastructure interaction and monitoring
- Deployed local, privacy-compliant LLMs to accelerate engineering velocity while protecting proprietary data
- Leveraged AI coding agents to rapidly refactor complex systems and automate infrastructure-as-code
- Mentored engineering teams on adopting AI-augmented workflows and integrating LLMs into CI/CD pipelines
- Used Python for API-driven infrastructure automation, real-time systems, robotics, monitoring, and data analysis.
- Validate R & D plans and results
- 3D modeling and CNC manufacturing

(Confidential) International Airline | **(Contract) Trainer of DevOps Engineers** | (Sep 2022 - Jul 2023)
Value: $10B+ Employees: 90k+
- CI/CD with Harness.io, AWS infrastructure with CDK+CFN, Migration to Github Enterprise from 5 other VCS
- architect and develop an internal ML/AI Software Development Co-Pilot trained on internal code repos to reduce code "re-invention" and time/effort

(Confidential) Cybersecurity and Biometric Identity Org | **(Contract) Trainer of DevOps Engineers** | (May 2022 - Sep 2022)
Value: $3B+ Employees: 10k+
- CI/CD with CloudBees/Jenkins and Argo-CD
- software testing with SonarQube, JMeter, and various other tools

(Confidential) Financial Services Org | **(Contract) Trainer of Robotics, Computer Vision, and ML Engineers** | (Nov 2021 - Apr 2022)
Value: $1T+ Employees: 225k+
- Robotics R&D, GCP, Machine Learning, Computer Vision, Software Development, Network & Physical Architecture, DevSecOps, Linux System Administration
- ROS 1&2 [Robotics Operating System], Dobot CR5, Python, C++

(Confidential) Chemical Engineering R&D and Production Org | **(Contract) Trainer of DevOps Engineers** | (Feb 2021 - Sep 2021)
Value: $10B+ Employees: 90k+
- CI/CD with Jenkins, SonarQube, JMeter, various software testing tools
- Azure & AWS infrastructure and network security architecture
- Architected an internal ML/AI Software Development Co-Pilot trained on internal code repos to reduce code "re-invention" and time/effort

Rooms To Go | **Principal DevOps Engineer** | (Nov 2018 - Feb 2021)
- Direct and train a department of DevOps Engineers and SREs.
- Train developers to follow DevOps & CI/CD processes.
- Architect Hybrid-Cloud and Multi-Cloud infrastructure.
- Set and enforce security practices.
- Develop tools and services in bash, Node.js, Python, and Go.
- Design, build, and deploy Docker containers, API Gateways.
- Automate and orchestrate infrastructure with Packer and Terraform.
- Built Python automation against cloud and service APIs for infrastructure operations.

MidAmerican Energy Services | **DevOps Team Leader** | (Oct 2016 - Jul 2018)
- Orchestrate infrastructure with Packer, Terraform, Chef, and Ansible.
- Build and maintain Kubernetes clusters serving microservices.
- Develop tools in Python, Go, bash, awk, sed, CircuitPython, and Arduino.
- Build and maintain Cassandra, MongoDB, and MySQL databases.
- Automated infrastructure and operational workflows with Python and PowerShell where Windows administration or executable documentation was required.

Cox Media Group [Technology] | **Solution Architect, Mobile** | (Dec 2012 - Oct 2016)
- Develop mobile client and backend POCs.
- Architect and deploy cloud infrastructure.
- Develop and maintain original Open Source software projects.
- Automated Windows and cloud administration with PowerShell and Python rather than leaving manual GUI procedures undocumented.
- Integrated ServiceNow ticket/workflow data into CI/CD and operational analysis workflows.

Cox Media Group [Technology] | **Software Development Manager** | (Nov 2009 - Dec 2012)
- Co-Manage a ~30 developer team.
- Improve performance through coaching.

- Encourage and inspire developers and vendors to give great service.
- Workflow automation scripting.
- Partnered with ServiceNow administrators to extract ticket/request data for analysis and process automation.

Cox Media Group [Technology] | **Internet Systems Manager & MySQL DBA** | (Jul 2008 - Nov 2009)

- Administer GNU/Linux servers.
- Manage a department of sysadmins.
- Workflow automation and config management.

Cox Media Group (Atlanta Journal-Constitution) | **MySQL DBA** | (Jan 2007 - Jul 2008)

- Administer MySQL.
- Optimize developer code.
- Maintain high availability and performance.

Yahoo! | **Technical Yahoo!** | (Mar 2004 - Jan 2007)

- Manage teams, projects, SLAs.
- Automate workflows.
- Develop PHP web applications.

Various | **Prior Professional Experience** | (Aug 1995 - Jan 2007)

- Companies include: Apple Computer, Lanier Worldwide, MedCenterDirect, Amazing Graphics, World Wide Development, and freelance work
- Tasks include: Technical Account Manager, Full Stack Developer, 3D Modeling, Graphic Design and Print Prepress

Skills

AI & Agentic Automation: OpenClaw & OpenCode · Agentic Workflows (MCP) · AI-to-API Integration · Local / Private LLMs · AI-Assisted CI/CD · Prompt Engineering
Amazon Web Services: CDK · CFN · EC2 · ECS · EKS · Fargate · EBS · ELB · RDS · S3 · SNS · SQS · IAM · VPC · SSM · Lambda · Route53 · CloudFront · CloudWatch · GuardDuty · DynamoDB · Auto Scaling
Automation/Orchestration & CI/CD: GitOps · Terraform · Packer · Ansible · GitHub Actions · Chef · CloudFormation · CDK · Jenkins · ArgoCD
Observability/Monitoring: Prometheus · Grafana · OpenTelemetry · OpenMetrics · OpenTracing · Nagios · Datadog · New Relic · Splunk · ELK; Elasticsearch, Logstash, Kibana
Machine Learning, Artificial Intelligence: Language Model · LLM · Neural Network · Transformer · GAN; Generative Adversarial Network · Computer Vision · NLP; Natural Language Processing · TensorFlow · PyTorch · Mojo · automatic1111 · oobabooga
Kubernetes, Docker, and containers: containerd · Podman · Helm · Argo-CD; Argo Project
GNU/Linux and BSD Server Administration: Linux · FreeBSD · OpenBSD · MacOS · Arch Linux, BTW · Debian · RHEL; Red Hat Enterprise Linux · CLI; Command Line Interface · SSH · Systemd; systemctl · System V; SysV Init · LSB; Linux Standard Base
Bash/Shell Scripting: POSIX sh · GNU Bash · Zsh
PowerShell Automation: Windows administration as executable documentation · Active Directory / Exchange / O365 automation · SQL Server administration automation · VMware automation · Cloud and CI/CD automation · ServiceNow integration
Service Management and Database Operations: ServiceNow workflow and catalog integration · ServiceNow data extraction for analysis · Microsoft SQL Server administration · Production database reliability
Graphics: Adobe Creative Suite · OpenSCAD · FreeCAD · Fusion 360
Web Development: HTML · CSS · JavaScript; ECMAScript · PHP
Interpreted Languages: Node.js · Python · Python REST/API automation · Python AWS automation before official AWS CLI · Django
Compiled Languages: Rust · Go/GoLang · C/C++
